CRAFTED

CARBIDE SCONCE

Description

Distilling the profile of archival mountaineering tools, the Carbide sconce draws on the intrepid heritage of headlamps designed for mobility worn by early miners.

A solid steel collar and armature secure the fixture, gripping an elongated central dual lamp, where a linear luminance rises into a clear glass chimney, and a diffused glow descends into a protective cage of heavy-gauge perforated metal.

Finished with a rich patina that highlights the raw steel beneath, this design transforms the unyielding spirit of a subterranean torch into a sleek, modern luminaire.

Finish Options

Aged Steel

Glass Options

Clear

Dimensions (approx.)

Overall Height: 20.625"

Overall Width: 4.25"

Overall Depth: 4.875"

Lamp

60W E26 (Med. Base)

Incandescent Max. (Per Socket)
